Omnik New Energy, world professional solar inverter manufacturer, supplies you high efficiency, high stability and high reliability solar inverter from 1.5kW to 20kW with max. conversion efficiency up to 98.2%. The omnik solar inverter is a highly reliable DC-AC PV inverter. Because MPPT and voltage management are handled separately for each module by the power optimizers, the solar inverter is only responsible for DC to AC inversion. Consequently, it is a less complicated, more reliable solar PV inverter. The fixed string voltage ensures operation at the highest efficiency at all times (98% maximum efficiency), independently of string length and temperature. Omnik New Energy, world professional solar inverter manufacturer, supplies you high efficiency, high stability and high reliability solar inverter from 1.5kW to 20kW with max. conversion efficiency up to 98.2%.
